Profile

Experienced Senior Engineer specializing in building scalable, collaborative frontend and mobile applications using React Native, React and TypeScript. Passionate about leveraging technologies to create impactful solutions. Committed to continue learning and developing innovative technology that enhance the user experience.

Experience

SENIOR ENGINEER | DELOITTE DIGITAL | MARCH 2022 – PRESENT

- Developed responsive UI components and pages for web and mobile applications using React Native and React, focusing on scalability, cross-platform functionality, and performance optimization.
- Built reusable React Native libraries and design systems, streamlining future projects and reducing development workload, while also collaborating with UX designers in Figma to transform client requirements into visually appealing, user-friendly designs.
- Led bug-fixing efforts by prioritizing, diagnosing, and resolving issues through manual end-to-end testing and unit tests, ensuring feature quality and alignment with client expectations across Australia.
- Worked closely with cross-functional teams, including designers, backend developers, and business analysts, to deliver client-focused solutions that meet project requirements.
- Debugged and troubleshot backend and API issues to ensure seamless integration, improving overall system performance and reliability.

FRONTEND ENGINEER INTERN | VEXEV | DEC 2020 – FEB 2021

- Collaborated with a small team to design and develop a web application using HTML, CSS, and Jinja, enabling clinicians to record and manage scanned data efficiently.
- Researched and evaluated solutions to optimize performance and ensure the application met user requirements and scalability goals.

Education

BACHELOR OF SOFTWARE ENGINEERING (HONOURS) | UNIVERSITY OF NEW SOUTH WALES | FEB 2018 – DEC 2021

- Graduated with Class 1 Honours
- Casual Academic Tutor for courses related to Frontend Development, Human Computer Interactions and Mobile Application Development

Technical Skills

- Programming Languages: React Native, React, JavaScript, TypeScript, NodeJS, HTML, CSS, Python, Shell, SwiftUI
- Other technology: Git, Figma, Github, Figma, Adobe Photoshop, Jira
- Operating System: Mac OSx, Linux, Windows 10
